

please reject the NAB's petition 04-160. We live in an area of limited quality radio and are paying for the opportunity to have a choice of the programing that XM Radio offers. We live mid-way between Chicago and Detroit and it is important for us to be able to know the weather and traffic when traveling to these cities. The weather can change rapidly and be dangerous for travel - please do not limit our ability to have this vital information available to us.

Respectfully,

Nancy Gates
